
GeoNode Administrators Workshop Documentation

Release 2.0

GeoNode

January 17, 2013

CONTENTS

1	Introduction	3
2	Preparing your environment	5
3	Installing GeoNode	7
4	Configuring GeoNode	9
5	Managing a GeoNode Installation	11
6	Theming GeoNode	13
7	Loading and Configuring data in a Geonode	15
8	Debugging a GeoNode Installation	17
9	Monitoring a GeoNode	19
10	Backing up and Restoring a GeoNode Installation	21
11	Deploying GeoNode	23

Welcome to the GeoNode Administrators Workshop! This workshop will teach how to manage a deployment of the [GeoNode](#) software application.

INTRODUCTION

PREPARING YOUR ENVIRONMENT

INSTALLING GEONODE

CONFIGURING GEONODE

MANAGING A GEONODE INSTALLATION

THEMING GEONODE

LOADING AND CONFIGURING DATA IN A GEONODE

DEBUGGING A GEONODE INSTALLATION

MONITORING A GEONODE

BACKING UP AND RESTORING A GEONODE INSTALLATION

DEPLOYING GEONODE

Introduction Learn about GeoNode administration

Preparing your environment Learn about preparing an environment for installation of GeoNode

Installing GeoNode Learn how to install GeoNode

Configuring GeoNode Learn how to configure GeoNode

Managing a GeoNode Installation Learn how to manage a GeoNode installation

Theming GeoNode Learn how to customize the look and feel of a GeoNode Installation

Loading and Configuring data in a Geonode Learn how to load and configure data in a GeoNode Installation

Debugging a GeoNode Installation Learn how to debug and troubleshoot a GeoNode Installation

Monitoring a GeoNode Learn how to monitor usage and other activity in a GeoNode Installation

Backing up and Restoring a GeoNode Installation Learn how to backup and restore GeoNode configuration and datas

Deploying GeoNode Review a sample GeoNode project deployment and learn how to create your own
